

To all of our Customers

22. Mai 2023

DECLARATION OF RoHS COMPLIANCE
EU RoHS Directive 2011/65/EU and Amendment EC 2015/863

Dear Sir or Madam,

We hereby confirm that the quantity of restricted substances in the products we deliver does not exceed the maximum concentrations specified in the RoHS-Directives 2011/65/EU (08.06.2011 and its latest edition) issued by the European Parliament and the European Council.

Accordingly, all products we deliver conform to EU RoHS-Directives.*

Exceptions exist for products ordered by customers who require non-RoHS production processes. In these cases, a non-RoHS exception permit is obtained. The delivery of non-RoHS products is based on separate contractual agreements.

We have implemented, as well as certified, corporate management system according to the standards ISO 9001, EN 9100, ISO 14001 and ISO 50001. Here alone, we have committed ourselves to evaluate and comply with legal obligations.

Therefore, we will of course continue to meet applicable RoHS Directives.

We also confirm compliance with the RoHS directive on every test certificate 3.1 according to EN 10204, which can be created with the delivery upon request in the relevant purchase order.

Our central RoHS contact persons have been designated. You can reach them under REACH.TEAM@ALUNNATUBES.com. As before, we ask you to refrain from sending us questionnaires or similar. This request to complete these still cannot be met by us.

Under www.alunnatubes.com we offer an information portal where updated information specific to the REACH or RoHS topic can be found. This covers all important information.

Should a substance be included in the RoHS Directive that occurs in our products with more than the permitted concentration, we will issue a new release!

We will keep our website updated too. It is worth visiting not only because of RoHS.
